

Stair Lifts

STRAIGHT STAIRLIFT

We offer a range of electric stairlifts for indoor and outdoor use to help people maintain full home access. They are available with easy to use paddle controls and digital status display systems. Other standard features include; padded swivel seats, safety belt, maintenance-free DC power pack, lockable isolation switches, fold-up seat and footrest, 5 safety cut-out sensors, 127kg weight capacity, infrared remote controls, electronic and mechanical breaking systems.

Easy to install and use, the stairlifts are specifically designed to provide a smooth and safe lifting operation suitable for domestic use. The rail profiles and chassis roller system prevent any sudden jerks or jolts whilst operating the whisper-quiet motion of the lift.

The stairlifts can also be supplied with 'perch' or 'sit/stand' stairlifts for those who have trouble sitting. Hinged rails are also available to avoid an obstruction to a doorway at the foot of the stairs.

Product Code: Acorn Indoor

OUTDOOR STAIRLIFT

The outdoor stair lift has all the features included with the indoor stair lift, but is designed and manufactured specifically for outdoor use. All metallic components are either made of aluminium, or are oil annealed or zinc plated before powder coating. Plastic components are heat and UV resistant, protecting the stairlift from colour fading and ambient heat damage.

They can be fitted to outdoor staircases, garden steps, sun decks, garage or basement steps. The outdoor stair lift is ideal for those living in coastal homes, as it is well protected from the ravages of salt air. An included durable plastic cover ensures added protection from the elements.

CURVED STAIRLIFT

Due to the complex nature of assessing and fitting curved stairlifts we would be glad to put you in touch with a leading industry supplier to conduct a detailed assessment and quotation.
